The first read that anyone should read is David Bach's Automatic Millionaire. Once that has been accomplished, this book would be my second recommendation. David Bach will teach you how to save, the Motley Fool will help you figure out what to do with it. The book is basic, fast read, and I would recommend it to anyone thinking about buying thier first stock.

What an easy to read informational book - the brothers Gardner can really put it together - I only wish they'd been around to write this 20 years earlier; it would have helped me a lot more - but still, better late than never. This book puts investing & money managing in more logical perspective than anything I've come across so far, and its lighthearted manner makes it a very easy read!

The reason I said that every woman should read this book is because women are so uneasy, uneducated and uninformed about HANDLING THEIR MONEY. In an artful, informative, lively, funny and beautifully written style, the awesome and overwhleming aspects of the Stock Market become clear. In a step by step approach, intelligently presented, the content of this book becomes a primer for implementing and creating a sane and personal approach to money managemnent. I, for one, am deeply grateful. This book has been a major force in my gaining confidence to optimistically manage and profit with my money. THANK YOU BROTHERS!!!!

Was never ready to get into the investing words because of all the horror stories I've heard. But after reading this book, it definitely puts things into perspective and will have you feeling more than capable and fired up to start. A must read for both the novice and advanced investors.

I love this book. Its a great first choice if you are interested in learning more about personal finance, retirement and investing.

The Motley Fool has a series of wonderful books, none better than "rule makers, rule breakers". Well worth your time.
